 Cebu City, Philippines

Top Skills

- Full Stack Development
 - React & Next.js
 - TypeScript & JavaScript
 - Django & Python
 - Node.js & REST APIs
 - PostgreSQL & MongoDB
 - AI Applications & RAG Systems
 - OpenAI & LLM Integrations
 - System Design & Architecture
 - Cloud Deployment & DevOps
-

Summary

I am a Full Stack Developer passionate about building scalable web applications, AI-powered solutions, and modern software systems that solve real-world problems. My expertise spans frontend development with React, Next.js, TypeScript, and Tailwind CSS, as well as backend development using Django, Node.js, Python, PostgreSQL, MongoDB, and RESTful APIs.

I enjoy developing products from concept to deployment, combining strong engineering fundamentals with modern AI technologies such as Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), intelligent chatbots, and workflow automation. I believe software should not only function well but also create meaningful impact for users and businesses.

Throughout my academic and personal projects, I have built AI-powered systems, e-commerce platforms, budget management applications, tournament management solutions, and data-driven web applications. I am constantly learning emerging technologies and applying them to build efficient, scalable, and user-focused products.

My goal is to contribute to innovative teams building next-generation applications powered by cloud computing, automation, and artificial intelligence.

Experience

Independent Full Stack Developer

Freelance & Personal Projects

2023 – Present

Designing and developing modern web applications, AI-powered systems, and business solutions using modern full-stack technologies.

Key Responsibilities

- Develop full-stack applications using React, Next.js, Django, Node.js, and TypeScript.
- Design and implement RESTful APIs and backend services.
- Build responsive and user-friendly interfaces using Tailwind CSS and modern UI frameworks.
- Integrate databases including PostgreSQL, MySQL, and MongoDB.
- Develop AI-powered applications using OpenAI APIs and Retrieval-Augmented Generation (RAG) architectures.
- Implement authentication systems, role-based access control, and secure data handling.
- Deploy and maintain applications using Git, GitHub, Vercel, and cloud platforms.
- Design scalable system architectures and database schemas.

Technologies

React • Next.js • TypeScript • JavaScript • Django • Python • Node.js • PostgreSQL • MongoDB • Prisma • Tailwind CSS • OpenAI API • Git • Vercel

AI Draft Optimization System for Mobile Legends: Bang Bang

Research Lead & Full Stack Developer

2025

Developed an AI-powered draft optimization platform that provides strategic recommendations for Mobile Legends: Bang Bang using Retrieval-Augmented Generation (RAG), player-specific analytics, and drafting intelligence.

Key Contributions

- Designed the system architecture and backend services.
- Developed AI recommendation pipelines using RAG techniques.
- Integrated player and hero data retrieval systems.
- Conducted functional and performance testing.
- Led technical documentation and research implementation.

Technologies

Python • Django • OpenAI • RAG • PostgreSQL • Machine Learning Concepts

Jose Rizal AI Chatbot

Full Stack Developer

2025

Built an AI-powered chatbot capable of responding according to the writings, philosophies, and principles of Dr. Jose Rizal.

Key Contributions

- Developed conversational AI workflows.
- Implemented user authentication and conversation management.
- Integrated OpenRouter AI APIs.
- Built conversation history and thread management systems.
- Developed admin analytics and monitoring tools.

Technologies

Django • HTMX • Python • OpenRouter API • PostgreSQL • JavaScript

E-Commerce Platform Development

Full Stack Developer

2025 – Present

Building modern e-commerce solutions with secure authentication, product management, payment workflows, and responsive user experiences.

Key Contributions

- Developed product listing and management systems.
- Implemented user authentication and authorization.
- Designed responsive storefront experiences.
- Built scalable backend APIs and database structures.
- Optimized SEO and application performance.

Technologies

Next.js • React • Prisma • MongoDB • TypeScript • Tailwind CSS

Projects

UPSee

University-focused platform designed to improve accessibility and user engagement through modern web technologies.

ETCP

Custom software solution designed to streamline workflows and improve operational efficiency.

Moonine Gallery

Creative web platform showcasing digital content and modern user experience design.

Timeless Threads

E-commerce application focused on product presentation, customer engagement, and scalable architecture.

Education

University of the Philippines Cebu

Bachelor of Science in Computer Science

- University Scholar
 - College Scholar
 - Specialized in Software Engineering, Artificial Intelligence, Database Systems, and Web Development
-

Technical Skills

Frontend

- React
- Next.js
- JavaScript
- TypeScript
- HTML5
- CSS3
- Tailwind CSS

Backend

- Node.js
- Express.js
- Django
- Python

- C++
- REST APIs

Databases

- PostgreSQL
- MySQL
- MongoDB
- Prisma ORM

AI & Automation

- OpenAI APIs
- Retrieval-Augmented Generation (RAG)
- LLM Integrations
- AI Chatbots
- Workflow Automation

Tools & Platforms

- Git
 - GitHub
 - Vercel
 - AWS
 - Figma
 - VS Code
 - Cursor AI
 - Chrome DevTools
-

Interests

- Artificial Intelligence
 - SaaS Development
 - Full Stack Engineering
 - E-commerce Platforms
 - Software Architecture
 - Basketball
 - Guitar
 - Gaming
-
